

CHIEF TECHNOLOGY OFFICER SERVICES

Let us ensure that technology meets your strategic objectives. For effective governance of IT, an appropriate structure that enforces accountability is required. This service is delivered in terms that make sense for business outcomes. It is based on years of experience in terms of the depths and possible points of failure where IT is concerned and how this impacts business therefore bridging the gap between IT and business needs. True to Principle 12 of King Corporate Governance, the governance body should govern technology and information in a way that supports the organizations in setting and achieving its strategic objectives. Therefore ensuring: an ethical culture, good performance, effective control, legitimacy.
